

EXPERIENCE AROMATHERAPY

Aromatherapy has been used for centuries to restore balance of the body, mind and soul. Going beyond the benefits of relaxation, it helps in body performance, improves immune defence and also to enhance overall well-being.

The benefits obtained from aromatherapy depend upon the quality of the essential oils. Extracted from various parts of the plants, the highly concentrated essence provides the greatest therapeutic benefits.

So, open up your senses to the beauty of aromatherapy-a true retreat of the body, mind and soul.

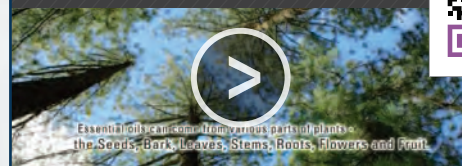

Essential oils can come from various parts of plants - the seeds, bark, leaves, stems, roots, flowers and fruit.

The chemical structure of essential oils can be altered if heated in too high a temperature, thus lessening the therapeutic effects and possibly producing toxic fumes. Do not leave the burner unattended as naked flame can create fire hazard.

Aromatherapy can be a tremendous help in stress relief. Stress lowers body resistance and makes one more vulnerable to illnesses.

GOODNESS INHALED

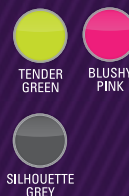

Novita PureScent™ Aroma Diffusers enhances your personal aromatherapy session with its advanced ultrasonic technology designed to facilitate efficient adsorption with its ability to dissipate smaller essential oil molecules. Overcoming the limitations of traditional candle heated burners, novita PureScent™ Aroma Diffusers eliminate the dangers of a naked flame and potential health hazard of toxic fumes, delivering pure aroma-therapeutic goodness. Being portable and lightweight with other handy features, you are in for a true retreat of the body, mind and soul!
