HOT & COLD WATER DISPENSER
NP 3310

HydroPlus® / HydroPure™

OLD RULES,
REDEFINED

REGAIN PRECIOUS
TIME WITH YOUR
LOVED ONES

Now you have instant access to hot, cold and room temperature water instead of spending time for separate boiling, cooling and storing.

REDISCOVER THE
SPACE IN YOUR
KITCHEN

Now you can do away with the clutter of individual appliances like the kettle, thermos flask and storage containers. Spruce up the kitchen at the same time with the modish and space-saving unit.

REDUCE SPENDING
THE SMART WAY

Now you have a unit to produce quality water at low cost. At just a fraction of the cost of bottled water, convert tap water into clean and fresh drinking water right in the comfort and convenience of your home or workplace.

REJOICE WITH QUALITY
WATER GOODNESS

Driven by Korean Made Advanced Ultra Hollow Membrane, enjoy alkaline antioxidant water with the HydroPlus® Filter or purified water with the HydroPure™ Filter. Unit is also equipped with Advanced Ultraviolet Germicidal Lamp for effective water disinfection.

GIVING YOU MORE THAN
JUST A WATER DISPENSER

There is more to the HydroCube™ Hot/Cold Water Dispenser NP 3310 than you think. Be surprised with extra time on hand and much-needed extra space all while enjoying quality water and savings at the same time.

Providing ultra-fine filtration up to particle size of 0.1 micron, the Korean Made Advanced Ultra Hollow Membrane Filter assures with quality water of national standards.

**ADVANCED
ULTRA HOLLOW
MEMBRANE FILTER**

Filter replacement is made easy and effortless with the thoughtful product design that caters for DIY installation.

**SIMPLE
DIY FILTER
REPLACEMENT**

Smart programmable settings allow for a personalized user experience through options to preset settings according to your preferences.

**SMART
PROGRAMMABLE
SETTINGS**

Novita HydroCube™ Hot/Cold Water Dispenser NP 3310 is a fun, compact and functional unit for your home and office! Not your regular water dispenser, NP 3310 makes a statement with its 6 exciting colour choices and sleek design you will love! Driven by Korean Made Ultra Hollow Membrane in your choice of HydroPlus® or HydroPure™ filter and advanced ultraviolet germicidal lamp for effective water disinfection, NP 3310 produces quality water in hot, cold and room temperature to keep you hydrated throughout the day. Easy to use with its 1-touch and auto dispensing option, customisable with its smart programmable settings and hassle-free with simple DIY filter replacement, NP 3310 certainly delights in more ways than you can imagine!

6-STEP COMPREHENSIVE FILTRATION SYSTEM

1 SEDIMENT SIEVER

- Comprehensive sieving filtration
- Filter suspended substances, rust and sediments etc

2 PRE-CARBON ELEMENT

- Adopt adsorption and catalytic reduction mechanism for effective adsorbent
- Provide first round of activated carbon filtering to remove volatile organic compounds (VOCs) and chemicals such as chlorine
- Improve colour and taste of water
- Deodorization

3 HYDROPLUS® ELEMENTS OR HYPURE™ ELEMENTS

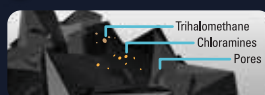

- Produce alkaline water to promote neutralization of excess acidic waste
- Promote antioxidant effect to slow down oxidation
- Smaller water molecule cluster size to promote better hydration and detoxification
- Irradiate Far Infrared Rays to form energy water to promote body metabolism and blood circulation

- Effective dechlorination and removal of heavy metal ions for a total purified water drinking experience
- Inhibit microbial activity through redox reaction and formation of hydroxyl radicals and hydrogen peroxide
- Smaller water molecule cluster size to promote better hydration and detoxification
- Irradiate Far Infrared Rays to form energy water to promote body metabolism and blood circulation

4 POST-CARBON ELEMENT

- Adopt adsorption and catalytic reduction mechanism for effective adsorbent
- Remove any remaining agricultural chemicals, disinfectants, trihalomethane and other harmful chemicals in source water

5 ADVANCED ULTRA HOLLOW MEMBRANE FILTER

- Adopt advanced ultra-fine hollow fibre microporous membrane technology
- Extensive physical size exclusion filtration to remove suspended colloids up to 0.1 micron while keeping essential minerals intact
- Effectively traps and eliminates up to 99.99% of waterborne micro-organisms such as E. Coli and Staphylococcus Aureus
 - Assure you with drinking water quality of national standard
 - Made in Korea

6 ADVANCED ULTRAVIOLET GERMICIDAL LAMP

- Produce UVC for effective water disinfection
- Protect water against a wide range of micro-organisms such as virus, bacteria, algae, yeast and cryptosporidium
- No residual remains or harmful by-products

CHANGE YOUR FILTER
IN 3 EASY STEPS

red dot design award

OLD RULES, REDEFINED

REGAIN PRECIOUS TIME WITH YOUR LOVED ONES

Get instant access to hot/cold temperature water without spending time for separate boiling, cooling and storing.

REDISCOVER THE SPACE IN YOUR KITCHEN

Do away with individual appliances like the kettle, thermos flask and storage containers for a modish and space-saving unit instead.

REDUCE SPENDING THE SMART WAY

Convert tap water into clean and fresh drinking water at just a fraction of the cost of bottled water.

REJOICE WITH QUALITY WATER GOODNESS

Driven by Korean Made Advanced Ultra Hollow Membrane, enjoy quality drinking water with HydroPure™ Filter.

Reclaim control of your precious time with its hassle free EzTwist® DIY filter replacement. Simply twist and remove the exhausted filters, replace with new ones and you are done!

**EZTWIST®
FILTER**

Rest assured to operate the unit continuously throughout the day without running up the electrical bill with NP 3360. The power efficient unit only requires 120 watts to run its cooler and 320 watts for its heater.

**POWER
EFFICIENCY**

For your convenience, NP 3360 is designed with a minimalist button which allows you to simply dispense your choice of water with just a gentle push at its dispenser lever; providing you the ease-of-use for both your home and office.

**OPERATIONAL
EASE**

Relish in a remarkable experience with Novita Hot/Cold Water Dispenser NP 3360 in its award-winning design! You will get to rediscover space in your kitchen and regain precious time with your loved ones due to its operational simplicity packed in its sturdy design that eliminates the clutter of individual appliances. Together with its hassle-free EzTwist® DIY filter replacement concept, you can reclaim more control over time as the filter can be changed in one simple twist. Driven by a Korean Made HydroPure™ Ultra Filtration System, be rewarded with energy water with smaller water molecules cluster size to promote better body metabolism and enhanced hydration. Enjoy instant quality hot and cold water with your loved ones and be surprised with time and space savings today!

DISCOVER THE 4 REWARDING PROPERTIES OF HYDROPURE™

PURIFIED WATER

Effective dechlorination and removal of heavy metal ions for a total purified water drinking experience.

MICROBIAL INHIBITION

Inhibit microbial activity through redox reaction and formation of hydroxyl radicals and hydrogen peroxide.

SMALLER WATER MOLECULE CLUSTER SIZE

Excellent hydrating properties to deliver nutrients and oxygen into cells as well as to discharge wastes and toxins out of the body.

ENERGY WATER

Activated by Far Infrared Rays through vibration resonance into energy water to promote metabolism and blood circulation.

EzTwist®

DIY FILTER REPLACEMENT MADE POSSIBLE WITH EZTWIST® FILTERS.

Designed with hassle-free EzTwist® DIY Filter replacement, wait no more for any service maintenance appointment. All you need is a simple effortless twist to get the job done at your ease of convenience!

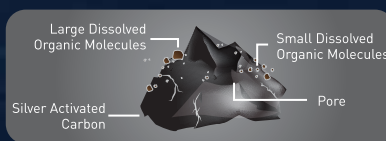

3-STAGE FILTRATION SYSTEM

STEP 1 STAGE 01// HYDROPURE™ FILTER

- Effective dechlorination and removal of heavy metal ions for a total purified water drinking experience
- Inhibit microbial activity through redox reaction and formation of hydroxyl radicals and hydrogen peroxide
- Smaller water molecules cluster size to promote better hydration and detoxification
- Irradiate Far Infrared Rays to form energy water to promote body metabolism and blood circulation

STEP 2 STAGE 02// SILVER CARBON BLOCK FILTER

- Adopt adsorption and catalytic reduction mechanism for effective adsorbent
- Provide activated carbon filtering to remove volatile organic compounds (VOCs) and chemicals such as chlorine
 - Deodorize, improve colour and taste of water
- Impregnated with silver, it also doubles up as an anti-bacterial element to inhibit the growth of bacteria within the filter

STEP 3 STAGE 03// ADVANCED ULTRA HOLLOW MEMBRANE FILTER

- Adopt advanced ultra-fine hollow fibre microporous membrane technology
- Extensive physical size exclusion filtration to remove suspended colloids up to 0.1 micron while keeping essential minerals intact
- Assure you with drinking water quality of national standard
