

- LOW POWER CONSUMPTION OF 19W*
- INCREASED MOTOR LIFESPAN*
- INCREASED EFFICIENCY*
- REDUCED NOISE*

*BASED ON HIGH FAN SPEED SETTINGS

UP TO
20 MILLION
NEGATIVE IONS

AIR PURIFIER NAP606

QUALITY AIR ASSURANCE

Novita PuriClean™ Air Purifier NAP606 is the practical solution to eliminating airborne pollutants and unpleasant odours.

This air purifier uses True HEPA Filter that efficiently removes up to 99.97% airborne germs and allergens. It also comes with a semi-permanent built-in ionizer, producing up to 20 million negative ions that can effectively eliminate airborne germs and allergens while providing an overall calming effect. Adopting PuriPRO™ Filtration System, the air purifier is also fitted with a DC Brushless motor system that consumes less power with an air flow rate up to 380 m³/hr and a coverage area up to 38 m², it is the perfect unit to introduce an urbane touch to your surroundings while ensuring clean and fresh air always!

Know your surrounding air quality as the built-in dual air quality sensor detects and instantly shares its results through the light indicators. Both smart and providing added convenience, this air purifier reminds users for timely filter replacement. Choose between Auto Mode Manual Fan Speeds or Programmable Timer for your desired customized user experience.

SPECIFICATIONS

Fan Speed	Turbo	High	Medium	Low	Silent
Air Flow Rate	380 m ³ /hr	220 m ³ /hr	170 m ³ /hr	130 m ³ /hr	90 m ³ /hr
Recommended Coverage ^o	38 m ²	22 m ²	17 m ²	13 m ²	9 m ²
Noise Level	57 dB	48 dB	45 dB	41 dB	< 40 dB
Power Consumption	57 Watts	19 Watts	13 Watts	11 Watts	9 Watts
Voltage / Frequency	220 V / 50 Hz				
Net Weight	5.1 Kg				
Dimension (W x D x H)	350 mm x 188 mm x 530 mm				
Filter Unit Capacity*	PuriPRO™ 3-in-1 Filter - Cool Catalyst + Granular Activated Carbon + 99.97% True HEPA -Suggested replacement 24 months* (Approx. 6,000 hours)				
PuriPRO™ Filtration System	Step 1: Washable Mesh Filter Step 2: Cool Catalyst Filter Step 3: Granular Activated Carbon Filter Step 4: 99.97% True HEPA Filter Step 5: Built-in Ionizer (Semi-Permanent)				
Negative Ion Density*	Up to 20 Million/cm ³				

^o The recommended coverage area is based on normal domestic indoor environment usage.
* Based on average eight (8) hours a day, seven (7) days a week usage under normal domestic indoor environment.
* Negative ion density measurement is based from source emission.

STEP

1 WASHABLE MESH FILTER

Washable Mesh Filter provides the first layer of air filtering system by capturing larger particles to improve the durability and enhance performance of subsequent filters.

FUNCTION

- Trap large particles such as hair, scurf, coarse particulates and fine dust present in the air.
- Prolong the lifespan of subsequent filters.

STEP

2 COOL CATALYST FILTER[◇]

Cool catalyst filter produces reactive oxidants to oxidize and eliminate airborne germs and harmful volatile organic compounds (VOCs). This reaction breaks down the contaminants into carbon dioxide and water molecules under normal room temperature environment.

FUNCTION

- Oxidize and eliminate airborne germs and harmful volatile organic compounds (VOCs).

STEP

3 GRANULAR ACTIVATED CARBON FILTER[◇]

Granular Activated Carbon removes unpleasant odours and chemicals in the air with its highly adsorbent granules. Each granule contains millions of microscopic pores to provide a large surface area capacity to absorb volatile organic compounds (VOCs), unpleasant odour and airborne chemicals.

FUNCTION

- Absorb volatile organic compounds (VOCs), unpleasant odour and airborne chemicals.

STEP

4 99.97% TRUE HEPA FILTER[◇]

A True High Efficiency Particulate Absorbing / Arrestance or True HEPA filter has high air filtering efficiency. It is capable of removing up to 99.97% of airborne allergens and germs with a size of 0.3 micrometers in diameter which includes very fine dusts, haze and smoke particulates, pet dander, mold spores, pollen some bacteria and viruses.

FUNCTION

- Remove up to 99.97% of airborne allergens and germs such as fine dusts, haze and smoke particulates, pet dander, mold spores, pollen, some bacteria and viruses.

STEP

5 BUILT-IN IONIZER (SEMI-PERMANENT)

Built-in Ionizer produces million of negative ions to promote air purification through the elimination of airborne allergens and germs. Negative ions also help to freshen up the air quality.

FUNCTION

- Eliminate airborne allergens and germs such as pollen, dust mites, pet dander, mold spores, bacteria, fungi and viruses.
- Freshen up the air quality.

[◇] Cool Catalyst Filter, Granular Activated Carbon Filter and 99.97% True HEPA Filter are combined as a single filter unit.

LEGEND

NOTE: The contaminants are magnified for better illustration purposes only and they are not in actual proportion to the Filters.
