NEGATIVE IONS

## AIR PURIFIER NAP620

### VIVACIOUS INTEGRATED FRESHNESS

Bringing fresh air quality to a whole new level, novita PuriClean™ Air Purifier NAP620 is the definition of chic sophistication infused with dynamic robustness. With an high air flow rate of 500 m³/h and a large coverage area of 538 ft² or 50 m², it is the perfect unit to introduce an urbane touch to your surroundings while ensuring clean and fresh air always! Large particles are trapped by the washable mesh filter while unpleasant odours are absorbed by the granular activated carbon filter. The cool catalyst filter oxidizes and eliminates airborne germs and volatile organic compounds (VOCs). Up to 99.97% of airborne allergens and germs are removed by the highly efficient True HEPA filter. Lastly, the semi-permanent built-in ionizer produces more than 40 million negative ions to keep airborne allergens and germs at bay and freshen up your indoor air quality. Enhanced with the new configuration DC Brushless Motor System, this unit has a sturdy and better unit lifespan to maximize cost efficiency. Breathe in the finest air quality with novita PuriClean™ Air Purifier NAP620 today!

### SPECIFICATIONS

Fan Speed	Turbo	High	Medium	Low	Silent
Power Consumption	55 Watts	15 Watts	8 Watts	6 Watts	5 watts
Air Flow Rate	500 m³/hr	290 m³/hr	200 m³/hr	120 m³/hr	100 m³/hr
Recommended Coverage	50 m²	29 m²	20 m²	12 m²	10 m²
Noise Level	50 dB	38 dB	30 dB	25 dB	18 dB
Voltage / Frequency	220 V/ 50 Hz				
Net Weight	6.0 Kg				
Dimensions (W) x (D) x (H)	337 mm x 195 mm x 615 mm				
Filter Unit Capacity*	<ul style="list-style-type: none"> <li>Cool Catalyst Filter</li> <li>- Suggested Replacement 24 Months* (Approx. 6,000 hours)</li> <li>Granular Activated Carbon Filter</li> <li>- Suggested Replacement 24 Months* (Approx. 6,000 hours)</li> <li>99.97% True HEPA Filter</li> <li>- Suggested Replacement 24 Months* (Approx. 6,000 hours)</li> </ul>				
5 - Step Air Purification	Step 1: Washable Mesh Filter Step 2: Cool Catalyst Filter Step 3: Granular Activated Carbon Filter Step 4: 99.97% True HEPA Filter Step 5: Built-In Ionizer (Semi-Permanent)				
Negative Ion Density+	≥ 40 Million/cm³				

\* Based on average 8 hours a day, 7 days a week usage under normal domestic indoor environment.  
+ Negative ion density measured is based from source emission.

• LOW POWER CONSUMPTION OF 15W\* •  
• INCREASED MOTOR LIFESPAN •  
• INCREASED EFFICIENCY •  
• REDUCED NOISE •

\* BASED ON HIGH FAN SPEED SETTING

### STEP

## 1 WASHABLE MESH FILTER

Washable Mesh Filter provides the first layer of air filtering system by capturing larger particles to improve the durability and enhance performance of subsequent filters.

#### FUNCTION

- Trap large particles such as hair, scurf, coarse particulates and fine dust present in the air.
- Prolong the lifespan of subsequent filters.

### STEP

## 2 COOL CATALYST FILTER

Cool catalyst filter produces reactive oxidants to oxidize and eliminate airborne germs and harmful volatile organic compounds (VOCs). This reaction breaks down the contaminants into carbon dioxide and water molecules under normal room temperature environment.

#### FUNCTION

- Oxidize and eliminate airborne germs and harmful volatile organic compounds (VOCs).

### STEP

## 3 GRANULAR ACTIVATED CARBON FILTER

Granular Activated Carbon removes unpleasant odours and chemicals in the air with its highly adsorbent granules. Each granule contains millions of microscopic pores to provide a large surface area capacity to absorb volatile organic compounds (VOCs), unpleasant odour and airborne chemicals.

#### FUNCTION

- Absorb volatile organic compounds (VOCs), unpleasant odour and airborne chemicals.

### STEP

## 4 99.97% TRUE HEPA FILTER

A True High Efficiency Particulate Absorbing / Arrestance or True HEPA filter has high air filtering efficiency. It is capable of removing up to 99.97% of airborne allergens and germs with a size of 0.3 micrometers in diameter which includes very fine dusts, haze and smoke particulates, pet dander, mold spores, pollen some bacteria and viruses.

#### FUNCTION

- Remove up to 99.97% of airborne allergens and germs such as fine dusts, haze and smoke particulates, pet dander, mold spores, pollen, some bacteria and viruses.

### STEP

## 5 BUILT-IN IONIZER (SEMI-PERMANENT)

Built-in Ionizer produce millions of negative ions to promote air purification through the elimination of airborne allergens and germs. Negative ions also help to freshen up the air quality.

#### FUNCTION

- Eliminate airborne allergens and germs such as pollen, dust mites, pet dander, mold spores, bacteria, fungi and viruses.
- Freshen up the air quality.

### LEGEND

#### ALLERGENS

#### GERMS

NOTE: The contaminants are magnified for better illustration purposes only and they are not in actual proportion to the Filters.
