

Air Sterilization Beyond Haze Period

SANITIZE YOUR INDOOR AIR ALL YEAR ROUND

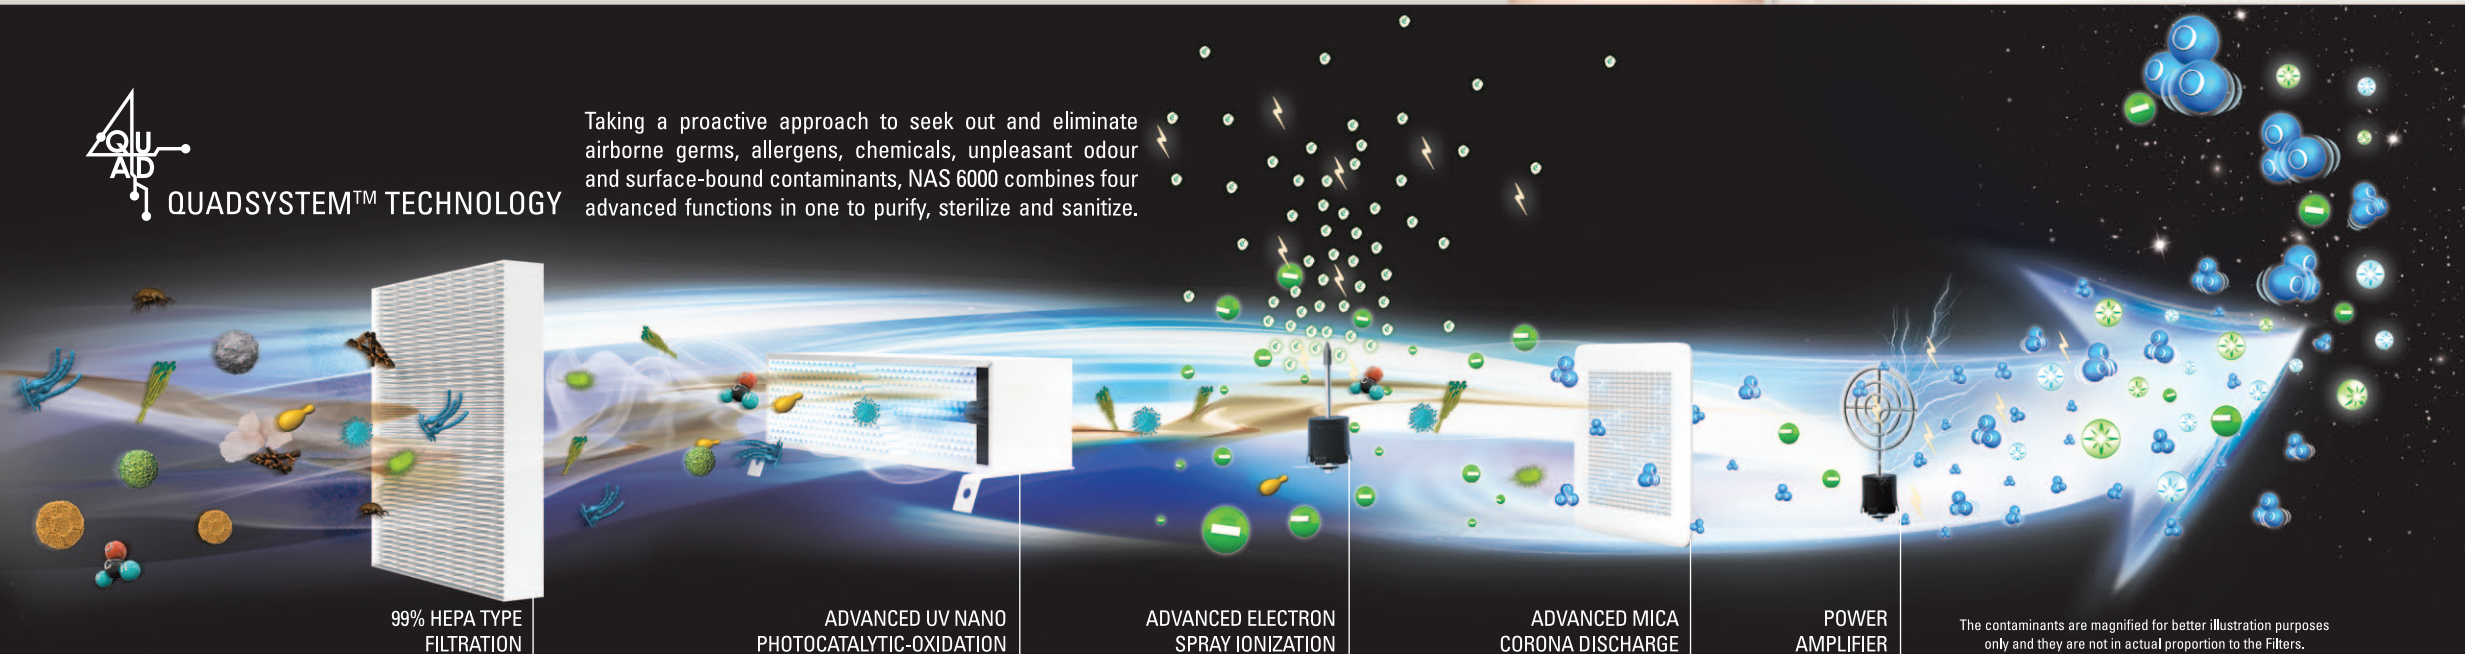

Go beyond air purification with AirCare Pro™ Air Sterilizer NAS 6000 as it provides additional surface sanitization support for optimum indoor air quality and much more. Driven by QuadSystem™ Technology, the NAS 6000 diligently purifies and sterilizes to eliminate airborne allergens, germs and even unpleasant odour or chemicals. Furthermore, its incredible oxidation capacity of ozone would oxidize and eradicate surface-bound germs for cleanliness and hygiene. With NAS 6000, enjoy top-notch indoor air quality and protection for you and your loved ones all year round.

FEATURES

QUADSYSTEM™ TECHNOLOGY

Taking a proactive approach to seek out and eliminate airborne germs, allergens, chemicals, unpleasant odour and surface-bound contaminants, NAS 6000 combines four advanced functions in one to purify, sterilize and sanitize.

AIR PURIFICATION → AIR STERILIZATION → SURFACE SANITIZATION

99% HEPA TYPE FILTRATION works by mechanical filtration and diffusion to trap airborne germs and allergens within its densely-packed fibre. It clears out up to 99% of airborne allergens and germs up to 0.3 micrometer particle size and also doubles up to improve the durability and performance of subsequent filtration mechanism.

ADVANCED UV NANO PHOTOCATALYTIC-OXIDATION results from the interaction between UV light rays and Titanium Dioxide (TiO₂) filter. Reactive oxidants such as Hydroxyl Radical (OH[•]) and Superoxide Anion (O₂⁻) produced in the process attached instantly onto airborne germs and eliminate them by oxidizing and weakening their cell membrane and protein coat.

ADVANCED ELECTRON SPRAY IONIZATION produces more than 25 millions Negative Ions consisting of Superoxide Anions (O₂⁻), Hydroperoxyl Radicals (HOO[•]) and Hydroxide Radicals (OH[•]). They purify the air by attaching onto airborne allergens thus making them too heavy to stay in our breathing zone. In addition, Hydroxide Radicals (OH[•]) and Hydroperoxyl Radicals (HOO[•]) break down the cell membrane and protein coat of airborne germs to eliminate them.

ADVANCED MICA CORONA DISCHARGE produces controlled Ozone (O₃) concentration level for air sterilization with its incredible oxidation capacity. Ozone (O₃) proactively oxidizes and weakens the cell membrane and protein coat of airborne germs to eliminate them. Additionally, Ozone (O₃) also freshen up the air quality readily with its effective odour control to prevent unpleasant odour from lingering around the air we breathe.

POWER AMPLIFIER produces the highest controlled Ozone (O₃) concentration up to 360mg/hr to perform a series of effective surface sanitization activities. With the high-power oxidation, surface-bound germs are eliminated quickly for a more thorough clean up.

PURIFY Keep your air free from harmful pollutants such as dust, smoke, haze particulates, pollen, pet dander, bacteria and mold spores! With the 99% HEPA Type Filter and combination of UV Lamp & Titanium Dioxide Filter, you can breathe well without worrying about airborne allergens and germs! In addition, feel the freshness in the air as Built-in Ionizer produces more than 25 million negative ions per cm³ to eliminate airborne allergens and germs. By creating an overall calming effect, negative ions also help to relieve stress, boost energy level and increase alertness.

STERILIZE Clear up the air rapidly with controlled ozone concentration produced from the Advanced Mica Corona Discharge. The incredible oxidation capacity of ozone provides effective odour control and eliminates airborne and surface-bound germs such as virus, bacteria and fungi.

SANITIZE Ensure the cleanliness and hygiene of contact surfaces with effective surface sanitization. Enhanced with Power Amplifier, oxidation capacity of the Advanced Mica Corona Discharge is boosted for a more efficient and thorough clean up.

More Air Purifier Promotions

NAP 101-i AIR PURIFIER

- 52 Watts (0.7 Watts at standby)
- 4-Step purification
- Coverage up to 270 sq.ft. or 25 m²
- Semi-permanent built-in ionizer
- ≥ 9 Million negative ions per cm³

AT \$199 U.P. \$239

+ PWP 12 Months Filter Pack at \$29 (U.P. \$69)

BUY NOW

NAP 501 AIR PURIFIER

- 35 Watts (Based on high fan speed setting)
- 5-Step purification
- Coverage up to 270 sq.ft. or 25 m²
- 99.97% True HEPA filter
- Semi-permanent built-in ionizer
- ≥ 20 Million negative ions per cm³

AT \$299 U.P. \$369

+ FREE 24 Months Filter Pack worth \$109

BUY NOW

NAP 611-i AIR PURIFIER

- Advanced DC brushless motor system
- 15 Watts (Based on high fan speed setting)
- 5-Step purification
- Coverage up to 646 sq.ft. or 60 m²
- 99.97% True HEPA filter
- Highest air flow rate up to 600 m³/hr
- Semi-permanent built-in ionizer
- ≥ 20 Million negative ions per cm³

AT \$599

+ FREE 24 Months Filter Pack worth \$129

BUY NOW

NAP 2000H 3-IN-1 AIR PURIFIER

- Advanced DC brushless motor system
- 26 Watts (Based on high fan speed setting)
- 3-Step Puriclean™ Complete system
- Air purification, humidification & ionization
- Coverage up to 388 sq.ft. or 36 m²
- 99.97% True HEPA filter
- Semi-permanent built-in ionizer
- ≥ 20 Million negative ions per cm³

AT \$699 U.P. \$799

+ FREE 24 Months Filter Pack worth \$169
